

⚡ SQL PROJECT - MUSIC STORE ANALYSIS ⚡

👤 MAIN OBJECTIVES

This project involves analyzing a online music store database using SQL. The goal is to gain insights into the store's sales, customers, and inventory by writing and executing SQL queries. The analysis covers a variety of business questions, from revenue trends to customer behaviors.

- 🗨 To demonstrate SQL skills by solving real-world business problems.
- 🗨 To perform data analysis on a music store dataset using structured queries.
- 🗨 To derive actionable insights from raw data.
